

Zecchini

BOOKBINDING EQUIPMENT since 1952

Zechini a Brand, a History

Zechini Gra.For was established in 1952. The company is specialized in manufacturing bookbinding and graphic arts machines suitable for small and medium size industries. Zechini is the only Italian company able to offer a wide range of bookbinding and converting machines, a constant and specialized assistance, training and after sales support to the customers.

Through the years Zechini has projected and realized a lot of products in the field of bookbinding and converting machinery. These products have been developed through the years with new technologies and new working procedures. During the last few years the research and development department has been increased both in human resources and new technologies. That allowed, and still allows the company to study and project highly innovative products that fit properly Zechini's worldwide customers.

Moreover in order to answer as proper as possible the questions of its customers, Zechini has always headed at the "customization" of its machines.

Zechini's customer driven philosophy has allowed the firm to gain a constant and continues growth in Italy as abroad and a costant development in the market of bookbinding and converting.

Zechini's 50-years-long success has been leaded by our mission: to give our customers worldwide the highest quality and reliability and an effective and timely commercial and technical assistance. That's why Zechini represents an ideal partner for everybody who works in the field of bookbinding and converting.
